New Year's Greetings!!

Bulletin receives Vermeil Medals

Ken Masters (#3589)

You may recall the three 2012 American Philatelic Society (APS) World Series of Philately shows that include a philatelic literature exhibition were NAPEX 2012 in June, APS STAMPSHOW 2012 in August, and CHICAGOPEX 2012 in November.

These exhibits are one of the few opportunities we have to present the *Bulletin* to the public and the only opportunity we have for expert APS accredited philatelic judges to critique it. In addition, our participation increases the awareness of The Perfins Club as the *Bulletin* entry is listed in each show's publicity and is available to all of the attendees to read and review.

We are pleased to report that we recently learned that *The Perfins Bulletin* (calendar year 2011) received a Vermeil Medal at both the APS STAMPSHOW 2012 and CHICAGOPEX 2012. Thus, the *Bulletin* received a Vermeil at all three of this year's APS shows. (See the July/August 2012

Bulletin [66:99] for the report on NAPEX 2012.)

The judge at each of these shows complimented us on the balance of content between reports of new finds and interpretations and society news. They also appreciated the diverse article authorship and strong international scope in subject matters.

Suggested improvements that were not a repeat from last year include stating the author for each article (even if it is the Editor) and a formal Table of Contents (TOC). Over the past few issues, we have attempted to comply with the first suggestion. A formal TOC was also suggested at NAPEX 2012. Based on the feedback that I received several of you, the addition of a TOC is not believed necessary. Thus, we do not anticipate adding one any time soon.

Thanks to each of you for sending me your articles or ideas for articles, feedback, and ongoing support. These awards are the result of everyone's combined efforts and we should all feel rewarded.

Monthly Updates of Canadian Perfins Handbook

Jim Graham - Editor, *The BNA Perforator*

Dear Colleague in Perfin Collecting: As you are aware the new *Canadian Stamps with Perforated Initials - Fifth Edition* is available for viewing and downloading, free of charge, at www.bnaps.org/pubs.htm#Book.

The information for each perfin pattern includes:

- user name
- early and latest date used and issue range of use
- other countries where the pattern is known
- now a check list of all known issues.

This information is regularly revised as new material is reported.

The BNAPS Perfin Study Group is extending the following offer to all members of The Perfins Club with an email address. Simply provide your email address to Jim Graham at jdgraham2@gmail.com and you will receive monthly updates to the online catalogue as well as new issues of *The Perforator* which is currently published 3 times a year.

The *Perfins Bulletin* is the official journal of The Perfins Club - Founded 1943

ASSOCIATE EDITORS

Rudy Roy - U.S. Perfins
Doug Turner - Non U.S. Perfins
Myra Walker - Proofreader

The Perfins Club membership is open to all persons interested in the collection and study of Perforated Initials and Insignia in postage stamps. Yearly dues are \$15 for U.S., \$18 for Canada and \$25 for other Non-U.S. Since the club is on a July 1 to June 30 dues year, appropriate dues adjustments are made the first year based on the actual date of membership. Annual dues include a subscription to *The Perfins Bulletin*, mailed bulk rate printed matter. Mailing by 1st Class for an additional postage charge. Applications are available at www.perfins.org or from the Secretary listed above.

Please submit *Bulletin* articles, news, or advertisements to:

Now you see it, now you don't!

Larry Cohen (LM#3774)

Here is a fun little puzzle to show you not everything is at it seems. Figure 1 shows an apparently unlisted pattern in the *Catalog of United States Perfins* (U.S. Perfins Catalog).

Figure 1
Is this a new U.S. Perfin Pattern?
(Actual size.)

The closest perfin is E-rated pattern **J62** (JHD) shown in Figure 2. The Catalog lists the verified

Figure 2
U.S. Pattern J62
(Actual size.)

user of **J62** as the "James H. Dunham & Company, New York, NY." Their street address was 340 Broadway and they were one of the oldest (founded in 1840⁽¹⁾) and largest dry goods companies in New York City at the turn of the 20th century. In fact, they went public with a stock offering in 1901 of \$1,250,000.⁽²⁾

It is not hard to believe that a company of this size would have substantial correspondence and even more mail from accounts payable and receivable

transactions. How then does an overworked and always rushed mail room cope? One answer is to speed up the perfinning process so the stamps could be used securely in the regular course of business without having to deal with the delays in manufacturing that punching the stamps could cause.

Answer: Fold over the stamps along the perforations in the sheet of stamps and punch 2 or 3 layers at one time. This would speed up the process exponentially and explain the many mirrored images found on this relatively common, E-rated pattern. But how does that explain the pattern in Figure 1? Easy - the fold-over happened not on the sheet's perforations, but just slightly off (Figure 3) creating the partial "mirror image" shown in Figure 1.

Figure 3
Fold-over misses the sheet's perforations creating the partial mirror image of J62.
(Double punched holes highlighted in pink.)
(Image 125% of actual size.)

Now you see it now you don't!

New England Perfin Meeting

Bob Szymanski (LM#145)

The New England Precancel and Perfins Clubs will be holding a joint meeting and swap on Saturday January 19, 2013, between 9AM and 3PM at the Milford Town Library. The library is located in downtown Milford, MA, off Rte. 16 on Spruce Street. It is easily reachable from I-495 Exit 19 Rte. 109 or Exit 20 Rte. 85. The meeting room is on the lower level and can be reached through the main entrance by either stairs or elevator. There is also a loading door from the outside employee parking lot directly to the room.

For detailed directions if you do not have MapQuest or a GPS, please call or email Bob Szymanski. His contact information is found on page 2 of this *Bulletin* under "Immediate Past President." Plenty of perfins will be there and, as always, the more the merrier! If you want any information on future private auctions, Bob will have the next five printed auctions available for inspection. If you want to view any country's perfins, please let Bob know and he will bring them for viewing.

!! Put CHATTNOOGA on your calendar !!

2013 Convention - August 20-24, 2013

Chattanooga Choo Choo Hotel

"Precancel Stamp Society" rate \$89 per night - higher for room in Pullman car.

Newer Members Q & A

How is the Value of U.S. Perfins Determined? - Part 2

The information presented below is a follow-up to the article found on page 3 of the January/February 2009 Perfins Bulletin [63:3], a copy of which can be found at The Perfins Club website, www.perfins.org, under the tab: Perfins Club Info/New Members Q & As.

As new members continue their journey down the perfins collecting road, the primary objective is probably to collect one of each of the 6,400+ perfin patterns found in the *Catalog of United States Perfins*. At some juncture in that journey, many collectors find themselves attracted to a specific issue(s) of stamp for almost as many different reasons as there are stamp issues. In that detour from the original collecting objective, the primary focus shifts from the perfin pattern, regardless of the stamps on which it is found, to the stamp issue that happens to be perfined.

The above-referenced transition becomes significant when one attempts to assess the value of accumulations to be purchased. The classic perfins collector mounts stamps face down to better define, or highlight, the perfin pattern. To be willing to pay “full price” when purchasing stamps for a classic collection, such a collector usually requires that the pattern be well centered, with no missing holes.

The issue collector, on the other hand, usually mounts stamps face up so that the issue can be easily recognized among the other attractive/interesting stamps in the collection. It would appear that issue

collectors are less concerned about the “wholeness” of the pattern, as long as there is enough of the punch present to clearly determine which specific pattern it is, to discern that it is different from the other patterns collected for that issue.

Such an observation seems to hold true whether it is a single Scott number that is being collected, or a particular issue with six or more denominations, hence more Scott numbers. Issue accumulations are frequently found for sale in lots of 100 to 1000 stamps, which introduces the modified question; **“How is the value of mixtures and/or issue accumulations determined?”**

For the novice perfins collector, buying mixtures and/or accumulations can be a challenging experience. It is of primary importance to establish that the seller is an experienced and knowledgeable collector/dealer of perfins. In the case of mixtures of 100+ perfins, it is usually helpful to learn where the stamps came from: the “breakdown” of a single collection or a collector’s duplicates from several collections. What different pattern ratings are likely to be included and how much duplication of punches? Finally, and most importantly, what is the seller’s rationale for pricing the lot?

The more information one can gather about what is likely to be in the accumulation under consideration for purchase, the easier it is to estimate the value. If there is little or no information about the contents, one must assume a

Another Cuban Perfin Proved – O&C

Robert Littrell (#3992)

I recently wrote an article for the May/June 2012 *Perfins Bulletin*: “Perfin Update – Which Perfins Remain Unidentified?” [66:64-65]. I have since made an acquisition which positively identifies another Cuban perfin. It had been postulated that the

Imprint on front of stamp verifies the user of Cuban perfin O&C was Odriozola y Cia.

perfin owner of the **O&C** perfin was **Odriozola y**

Cía, a hardware importing company operating in Cienfuegos, but a cover has not been produced.

The discovery of the 2 centavos Cuban *Timbre Nacional* revenue stamp, shown front and reverse, with the imprint of a circular double line seal of Odriozola y Cía and a date stamp of July 5, 1923, is seen. Based on the few postage stamps in existence, all of the 1917 issue, it was not previously known that the company’s use of stamps extended as long as 1923, nor was it previously known that the company used *Timbre Nacional* revenue stamps. So with three attributes of this perfin learned from one stamp, I was feeling pretty lucky.

Newer Member Q & A (cont.)

minimal expectation: most of the patterns therein are likely to be “F” rated with considerable duplication including many damaged stamps with less than complete punches. If one can figure out what to do with that kind of philatelic material (and that is questionable) the value, on average is likely to be no more than four cents a stamp.

If you have decided to pursue issue collecting, the above premise of “the more information you can gather about what is likely to be in the accumulation to be purchased, the better you can assess the value” still holds true. Issue accumulations are usually offered different from general perfins mixtures. However, their source is equally important. Was it picked from one collection or several collections? What is the level of duplication? What is the range of pattern ratings? In addition, what is the seller’s rationale for pricing the lot? One must remember that with issue collecting, the primary collecting focus shifts from the perfin pattern to the stamp issue.

Again, generally speaking, issue collectors are less fussy about having a complete perfin pattern,

but rather enough of the punch to clearly identify a particular pattern. As mentioned earlier, the focus here is that you are “collecting a stamp issue that happens to be perfined.” Because the perfin patterns in issue collections are often less than pristine, accumulations can frequently be purchased at a discount from the full catalog value of the inventoried stamps.

Remembering from earlier discussions in this column that “there are no established rules for stamp collecting,” most experienced collectors have found it advantageous to construct their own guidelines. Learning about guidelines that have been developed by others who have gone before you, may well make your collecting journey more fruitful.

If members have questions about the information presented above, please mail them to Jerry Hejduk, PO Box 490450, Leesburg FL 34749-0450 or email them to flprepers@comcast.net or to the Bulletin Editor at his address listed on page 2. Similarly, considered opinions that differ from the viewpoints presented in this column are always welcome at the same addresses.

Feedback on Jack Brandt’s “Mysteries”

Ken Masters (#3589)

One of the most satisfying aspects of being a member of The Perfins Club and particularly *Bulletin* Editor, is participating in the sharing of knowledge about our intriguing hobby. Harvey Tilles’s (LM#7) fascinating article on pages 6 and 7 is a prime example. However, there is more!

About a week after I received Harvey’s initial email on this subject, Brian Freeman (#3008) sent me the following comments about Jack Brandt’s “Some Mysteries to Ponder” article [66:136]:

“The three hole triangle found on Hawaiian stamps is a ‘patent defacing cancellation.’ Per the introduction in the *Scott Specialized Catalogue of United States Stamps & Covers*, ‘Patent cancellations generally fall into three groups,’ one of which has ‘small pins or punches which pierce the paper or depress it sufficiently to break the fiber.’ The cancellation is somewhat similar to the Sloper’s arrow pattern that was used to cancel Great Britain postal cards during the 1870’s, but differs in that the pins put into the Hawaiian stamps were not necessarily intended to go all the way through (which would puncture

the envelope and contents).

“The Canadian stamp probably received the extra perforation holes due to the printer having the stamps manually perforated with a rotary perforator. The person applying the perforations probably noticed the misalignment, and stopped feeding the sheet into the perforator before the entire length of the stamp had been perforated. This sort of thing is mentioned in *Early American Perforating Machines and Perforations 1857-1867*, by Winthrop S. Boggs.”

In a subsequent email, Brian adds that the Scott Catalogue does not indicate anything about the location or locations where the patent defacing cancellations were used. Thus, you will not see any mention of them existing on Hawaiian stamps. Brian has one of the Hawaiian Patent Cancels, similar to the one shown in Jack’s article, in his collection, but it is a different denomination.

Many thanks go to both Harvey and Brian for sending me this information about these very fascinating items. I am sure your fellow Club members enjoyed learning about them as much as I did.

Patent Cancels of Hawaiian Islands

Harvey Tilles (LM#7)

In answer to Jack Brandt's (LM#14) query about the punches in the Hawaiian stamp Scott #35 shown on page 136 of the November/December 2012 *Bulletin* [66:136], this is a patent cancel.

Patent cancels were used in the Hawaiian Islands as early as the 1850's. Many of the patent cancels were patented at the patent office in Washington D.C. but others were designed and manufactured by the local postmasters. The cancels may punch a hole, scarification (scratches or small cuts), and/or cut.

The "pumpkin face" was ordered by Hawaiian Postmaster General Brickwood in 1876 to prevent the reuse of postage stamps. The patent consists of a target of three hollow center pins placed in the center of three concentric circles. The outer ring was divided into 4 segments. The cancel punched pieces out of the stamps and envelopes.

After a year (1877) the cancel was replaced with an altered cancel. Apparently the pins were "canceling" the enclosed letter of contents. The alteration was accomplished by shortening the pins which gave the appearance of a "pumpkin face" as shown in Figure 1. This cancel was used from 1877-1894. The cancel shown by Jack Brandt is a clear example of the altered one.

Figure 1
Altered Pumpkin Face Cancel

A second example of the "pumpkin face" is shown in Figure 2. This one is on a Scott #34 and was part of an auction lot offered some time ago in one

Figure 2
Before or after alteration?

of the Harmer auctions. Without having the actual stamp, it is difficult to determine if this is before or after the 1877 alteration.

A different patent cancel scarified the stamp by producing a series of regular dashes, thus making a punch cancel which penetrated the stamp. (Figure 3.) This cancel was used until about 1870.

Another scarifying cancel resembles a "bull's-eye" with a center pin that punched a tiny hole into the stamp. (Figure 4.) It, too, was used until about 1870, and was also used in the United States.

Figure 3
Dashes scarify the stamp.

Figure 4
Center pin punches a hole in the stamp.

Finally, examples on cover of these three different patent cancels used in the Hawaiian Islands are shown in Figure 5 on page 7. This is a scan of part of one page from my prize winning exhibit "To Prevent Postal Fraud and Deceit."

In summary, be on the lookout for such patent cancels in the various auctions, dealer's stock, etc. They are very interesting and will add significant interest to your perfin collection.

Meyer & Harris, *Hawaii: Its Stamps and Postal History*, Philatelic Foundation, New York, NY.

Private Auctions Update

Bob Szymanski (LM#145)

Never before have such wonderful perfin collections become available in such a short span of time. I will run five monthly auctions from January through May, 2013, that will contain parts of the worldwide perfin collections of Bob Schwerdt (#505-L), Dave Begin (#3659), Steve Koning (#2662) and Mike Falls (LM#131).

Every Club member is invited to request an auction listing by calling, writing or emailing Bob

Szymanski whose contact information is on the inside cover of this *Bulletin* (page 2) under "Immediate Past President."

To date, donations to from these auctions has accounted for over \$40,000 in contributions to The Perfin Club! So help your collection, help our members and their estates, while at the same time you will be helping our Club.

Hawaiian Patent Cancels (cont.)

1864: Bull's-eye cancel with a single punch.

1879: Three hole "pumpkin face" cancel.

1866: Multiple cutting head canceller.

Figure 5
Excerpt from a page showing Hawaiian Patent Cancels from exhibit "To Prevent Postal Fraud and Deceit."

What about this Railroad Cover?

Ken Masters (#3589)

Pictured at the right is a cover that recently sold on eBay which should be of special interest to all railroad perfin collectors. You will notice that the Santa Fe "freight received notification" post card is franked with a 1-cent Washington/Franklin coil that is perfinned with F-rated pattern S121 (SFE). The postmark is a 1924 Mayer, AZ, duplex handstamp.

By now, you may be thinking that would be great addition to my collection. Perfinned coils are rather rare, particularly on cover. So, maybe the value is around \$30.00. Here is where it gets interesting. After a total of 10 bids by two bidders, the final selling price was \$141.51 plus \$1.00 shipping!

My guess is that the buyer needed this item to fill a "hole" in an exhibit focusing on coils. What do

you think? Send your ideas to me (page 2) and we will share them in a future *Bulletin*

Santa Fe post card franked with 1-cent Washington/Franklin coil stamp perfinned with F-rated pattern S121. (eBay #230885722028.) (Reduced from actual size.)

New Puerto Rico Perfin Users

Bob Szymanski (LM#145)

Whenever a perfin cover passes into my hands, I look at so many different things that I hardly know where to begin explaining how my mind works. Maybe someday the *Bulletin* Editor will ask me to go into more detail, but for now here are a couple of covers that deserve some attention.

Pictured are two perfins covers from different companies, both clearly used in Puerto Rico - a territorial location not listed for either pattern in *The World Perfins Catalog - American Section*.

The first (Figure 1), postmarked February 16, 1942, is an early WWII airmail cover from DuPont to their Wilmington, DE, company location. Part of the return address has been blacked out but can still be read to be "WILMINGTON, DEL., U.S.A." The perfin is a pattern **D130** (DU/PONT). Without contents, one can only conjecture that this was either

a printed, pre-stamped business reply envelope or an employee sending correspondence back to DuPont.

The second cover (Figure 2 on page 9) is postmarked July 8, 1946. The 2-cent Prexy is perfined and is used in conjunction with a 6-cent embossed cover making up the 8-cent airmail rate. The perfin is pattern **E63** (ELAC), whose user is listed as "The Employers Liability Assurance Corporation, Ltd., of London, Boston, MA," in the *Catalog of United States Perfins*.

The cover was mailed by the "American Employers' Insurance Company, San Juan, Puerto Rico." The logo in the corner card indicates there is some connection between this company and "The Employers' Group."

An Internet search for American Employers' Insurance Company shows a listing in Boston, MA,⁽¹⁾

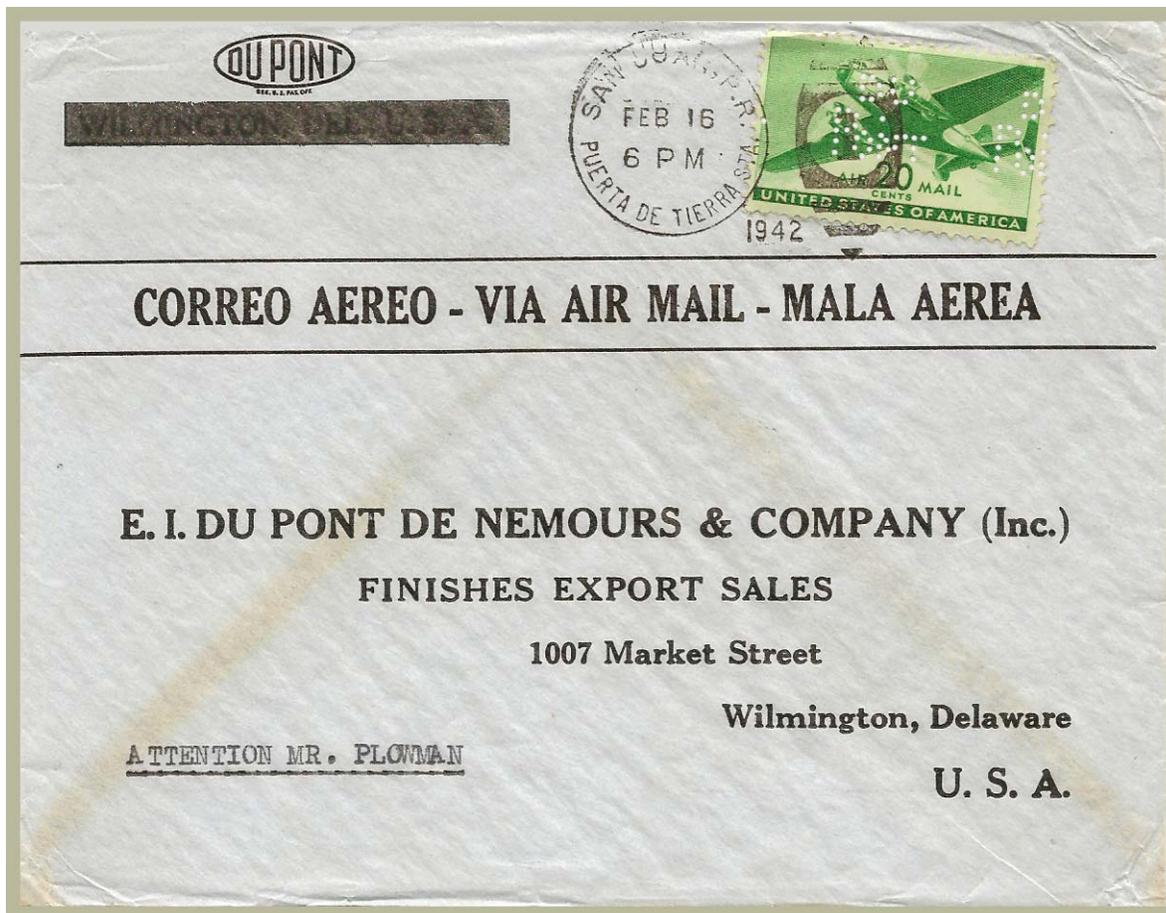

Figure 1

E.I. Du Pont de Nemours & Company, Inc. Wilmington, DE, cover with February 16, 1942, San Juan, PR, postmark. Cover franked with 20-cent Air Mail stamp (Scott #C29) perfined with F-rate pattern D130. This pattern is not listed in *The World Perfins Catalog - American Section* for Puerto Rico. (Actual size.)

New Puerto Rico Perfin Users (cont.)

the same city as the verified user of perfin E63. A listing was also found for the Employers' Group in Boston, which is another insurance company.⁽²⁾ I cannot find a direct connection between these various insurance companies.

As indicated on the corner card, "Victor Braegger, Inc." apparently represented the American Employers' Insurance Company in San Juan. One reference shows Mr. Victor Braegger, President of Victor Braegger, Inc., an insurance company in San Juan,⁽³⁾ which confirms the cover's information. However, to further confuse the issue, Victor Braegger is a populated place in the Guaynabo municipality near San Juan.⁽⁴⁾ In our searching we could not determine if the company was located in this municipality, but it seems possible. Although there are many questions, the cover could well be a legitimate use.

[Editor's Note: A cropped version of the American Employers' Insurance Company cover was shown on page 197 of the October 2007 *Bulletin*

[61:197]. However, with the additional information that is now available on the Internet, we thought this update was interesting and appropriate.]

Images of these covers and the information discussed above have been forwarded to the Foreign Catalog Chairman for possible inclusion in the update and revision of *The World Perfins Catalog - American Section* which has been in the works for several years now.

American Employers' Insurance Company, San Juan, PR, cover.
The 2-cent Prexy stamp (Scott #806) that is used as part of the postage is perfinned with E-rate pattern E63.
This pattern is not listed in *The World Perfins Catalog - American Section* for Puerto Rico.
(75% of actual size.)

Thanks for the Donation!

Ken Masters (#3589)

I recently received a donation of slightly more than \$38.00 of unused U.S. postage from Bruce Nesbitt (#3699) to help offset some of the *Bulletin* mailing expenses. Bruce indicated that he discovered these stamps after he and his wife returned to Ottawa

from her posting to the Canadian Embassy in Washington D.C. As the cost of stamps is one of our major expenses, we will certainly put these to good use. Thank you for your thoughtfulness.

U.S. Pattern N36.5I - User Verified

Steve Endicott (LM#2284)

I had a splendid time at the August 2012 Precancel & Perfins convention in Albuquerque, NM. At the convention, I was fortunate to stumble across the strip shown in Figure 1 below. This strip has the first letter "B" from the N36.5I perfin belonging to the "National Bank of the Republic. Chicago, IL." As shown in Figure 2, this is a carpet pattern with one letter cleverly punched into each of ten adjoining stamps.

When I checked the current *Catalog of United States Perfins* (U.S. Perfins Catalog) and *The Addendum*, I was astonished to learn that the user of this perfin has never been formally verified. The strip shown in Figure 1 combined with the prior confirmation of the ten-stamp carpet pattern provides the desired verification of the user of this pattern.

I then searched the *Bulletin* archives and found an excellent and thorough article about this pattern on pages 14 & 15 of the January 1996 issue [50:14-15]. This article, written by then U.S. Catalog Chairman, John Randall (#1336), documents the linkage of the ten letters and provides interesting historical information about our knowledge of this pattern. I recommend that members look up and read this article. Quoting a portion of the article:

"The previous edition of that catalog (1966)

lists several of the individual letters as having verified covers. The 1958 non-illustrated catalog does not provide information on any of the dies. Thus, most of the verifying covers, if indeed they do exist, appeared after the 1966 [sic] Catalog was published. If so, where are these covers today? In fact, it is quite possible that all 10 identifying covers have never been seen. Somewhere in the past, someone probably saw strips of this pattern that were sufficient to prove that the carpet pattern existed. Unfortunately, this data was not published. ...

"Somewhere, at least one cover must exist with an identifying corner card. ...

"At the 1995 Precancel-Perfin Convention in Wilmington, Delaware, I was offered a perfin accumulation that was astonishing! There were a number of multiples of the NBREPUBLIC pattern, almost enough to reconstruct the entire pattern. The entire pattern has been reconstructed from these multiples as shown in the accompanying illustration. [Figure 3 on page 11.] The only missing link is the 'L' pair, and I have seen this pair in another collection. Thus the proof is complete and perfin pattern N36.5 can be

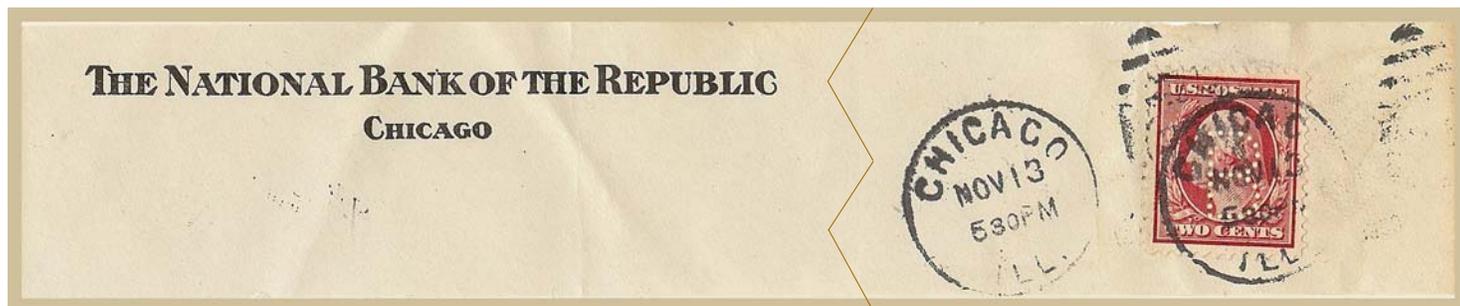

Figure 1

The National Bank of The Republic, Chicago, IL, cover strip with first letter "B" from pattern N36.5I. Verifies previously assumed user of N36.5I.

(Center part of strip electronically cropped for space purposes. Corner card and stamp with perfin are actual size.)

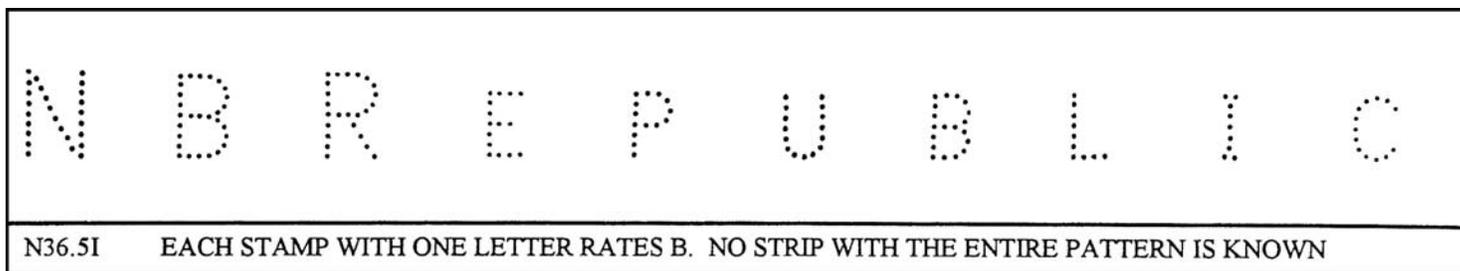

Figure 2

Reproduction of pattern N36.5I from the U.S. Perfins Catalog. (Actual size.)

Pattern N36.5I - User Verified (cont.)

listed without fear of error. However, proof that it is indeed The National Bank of the Republic must be taken on faith from the previous catalog. ...”

Now we have the documentation for the first letter “B”, which from the letter-stamp linkage, provides verification of the user for the entire pattern. This will be noted in A&C#4 of the current Catalog. Also, the user name will be corrected to “The National Bank of the Republic” (added leading “The”). Now I wonder,

are other covers or strips in existence for the N36.5I pattern, especially for other letters? If you have one, please share them with the U.S. Catalog Chairman. My contact information is on page 2.

[Editor’s Note: For those who would like to read the January 1996 article referenced above, go the Club website, www.perfins.org, hover over “Publications,” click on “Bulletin Back Issues,” select “1996,” and scroll down to page 14 of the January issue. For those who do not have Internet access, please contact the Editor (page 2) and I will mail you a copy.]

Alternate User Found for U.S. Patterns H86 & N173

John Welsch (#3822)

While looking through some perfin covers that I had not checked carefully, I found a couple discussed in this article that appear to have new information for the *Catalog of United States Perfins* (U.S. Perfins Catalog).

Pattern H86

The U.S. Perfins Catalog lists the primary verified user of B-rated pattern **H86** (HH/&M) as "Hornick, Hess & Moore, Sioux City, IA." An alternate user "Hornick, Moore, Porterfield, New York, NY," is listed in the Catalog's Supplemental Information pages. The perfin has been found in stamps issued between 1902-1917.

The user of the cover shown in Figure 1 below is clearly "Hornick, More & Porterfield, Sioux City, IA." Notice the differences between this user and the ones listed in the Catalog. First, is the name "More," not "Moore." Second, the "Sioux City, IA," postmark matches the Catalog's primary listing, but not the alternate one. All confusing, but rather intriguing.

With the help of some Internet research, the Editor was able to trace the company's history and its various names. There is no doubt that the company

was founded by John Hornick in Sioux City, IA, after he relocated from Memphis, TN, in 1867.^(1, 2)

According to his obituary, Hornick became a partner of A.T. Wallis in the firm of Hornick & Wallis in Sioux City.⁽¹⁾ Then in 1886 the business was incorporated under the name of Hornick Drug Company. A.J. Moore, W.R. Webb and W.W. Van Dyke were associated with Hornick in this endeavor. Later that same year (1886), the company name was changed to Hornick, Hess & More and then to Hornick, More & Porterfield prior to his death in 1911. Notice, at least in the obituary, the consistent usage of "More" in the company name, even though the person associated with Hornick was "A.J. Moore."

Searching further, references were also found that use "Moore" in the company name. First, is a reference to A. J. Moore of Hornick, Hess & Moore, Sioux City, IA, in the July 1905 issue of *Meyer Brothers Druggist*.⁽³⁾ Then, the *Proceedings of the Iowa Pharmaceutical Association 30th Annual Meeting* held in July 1909 include a thank you for work done for the Association to Hornick, Moore & Porterfield, Sioux City, IA.⁽⁴⁾

Figure 1

Hornick, More & Porterfield, Sioux City, IA, cover with January 31, 1916, Sioux City, IA, postmark. Cover franked with 2-cent Washington stamp perfined with B-rate pattern H86 that shows a new alternate user for H86 and an additional postmark for this user. (Actual size.)

Alternate User - H86 & N173 (cont.)

The one thing for certain is the progression of the company name confirms the order of the listings of **H86** in the Catalog and the (HH/&M) perfin. "Hess" was in the name until the 1909 timeframe. Also, it appears that "More" and "Moore" were both used, as evidenced by the references, and, more importantly, the verified original Catalog listing and the corner card on the cover shown in this article.

So, based on all of this, the U.S. Catalog Chairman will record both company names as alternate users in the Supplemental Information pages of A&C#4. He will also include the Sioux City, IA, postmark for "Hornick, Moore & Porterfield."

Pattern N173

The second cover shown in Figure 2 below also bears a Sioux City, IA, postmark. The stamp is clearly perfined with D-rated pattern **N173** (NW/G) and it was mailed by "Iowa Telephone Company," a part of the "American Telephone & Telegraph Co." or the "Bell System."

Now looking at the listing for **N173** in the Catalog, the verified user is "Bell Telephone Company, Omaha, NE." An additional postmark of Minneapolis, MN, is listed in the Supplemental Information. Thus, it appears this cover provides an

additional user and postmark for **N173**.

Again, with the help of the Internet, the Editor found some information that seems to confirm this new information. The Iowa Telephone Company changed its name to Northwestern Bell Telephone Company in 1920.⁽⁵⁾ Northwestern Bell became one of the 22 Bell Operating Companies serving the states of Iowa, Minnesota, South Dakota, North Dakota, and Nebraska. While incorporated in Iowa, its headquarters were located in Omaha, NE. Northwestern Bell is now part of Quest Corporation, formerly named U.S. West Communications, Inc.

After reviewing this information, the U.S. Catalog Chairman intends to add "Iowa Telephone Company, Sioux City, IA," as an alternate user for **N173** in A&C#4.

St. Louis Perfin Identified - Pattern B170

Dave Smith (#1514)

A couple of months ago I attended a local stamp show and only found one perfin cover, shown below in Figure 1, worth considering. As I did not recognize the user, I bought it even though the first "B" in the pattern is only partially in the stamp.

After returning home and checking my *Catalog of United States Perfins* (U.S. Perfins Catalog), I see that it is C+ rated pattern **B170** (BNB). This perfin has been seen in a stamp with a St. Louis, MO, postmark, but the user is not known. Thus, based on this cover, it appears this perfin belonged to "B. Nugent & Bro. Dry Goods Co., St. Louis, MO."

A scan of the cover was sent to the U.S. Catalog Chairman for his information and review. He agrees that the user for **B170** has been found. However, as we try to avoid abbreviations in the user names listed in the Catalog, the question became: "Is 'Bro.' singular or plural?"

After an exchange of emails and a bit of research on the Internet, the Catalog Chairman found a lengthy discussion about company's history and its founder, Byron Nugent, in Volume V of the *Centennial History of Missouri*.⁽¹⁾ Byron Nugent was born in

Marysburgh, Prince Edward County, Ontario, in 1842 and died in St. Louis, MO, in 1908. After college, he worked in several different merchandising business in Ontario, New York and Chicago.

He migrated to St. Louis in 1873, purchased a small store, and conducted business as the single owner until 1878. At that time, he admitted to partnership his three brothers, James G., Daniel C., and Charles W. Nugent. Business was carried on under the name of B. Nugent & Brothers.

Then in 1899, their interests were incorporated under the name of B. Nugent & Brothers Dry Goods Company, with Byron Nugent the president. His careful direction of the business and well laid out plans, the integrity of his methods, and his unfaltering enterprise proved effective elements in the attainment of notable success.

Upon Byron's death, James Nugent became president and carried on his brother's practices and methods. Thanks to his hands-on style and many years spent on the floor in his capacity as store superintendent, James became a familiar figure to large numbers of regular customers.⁽²⁾

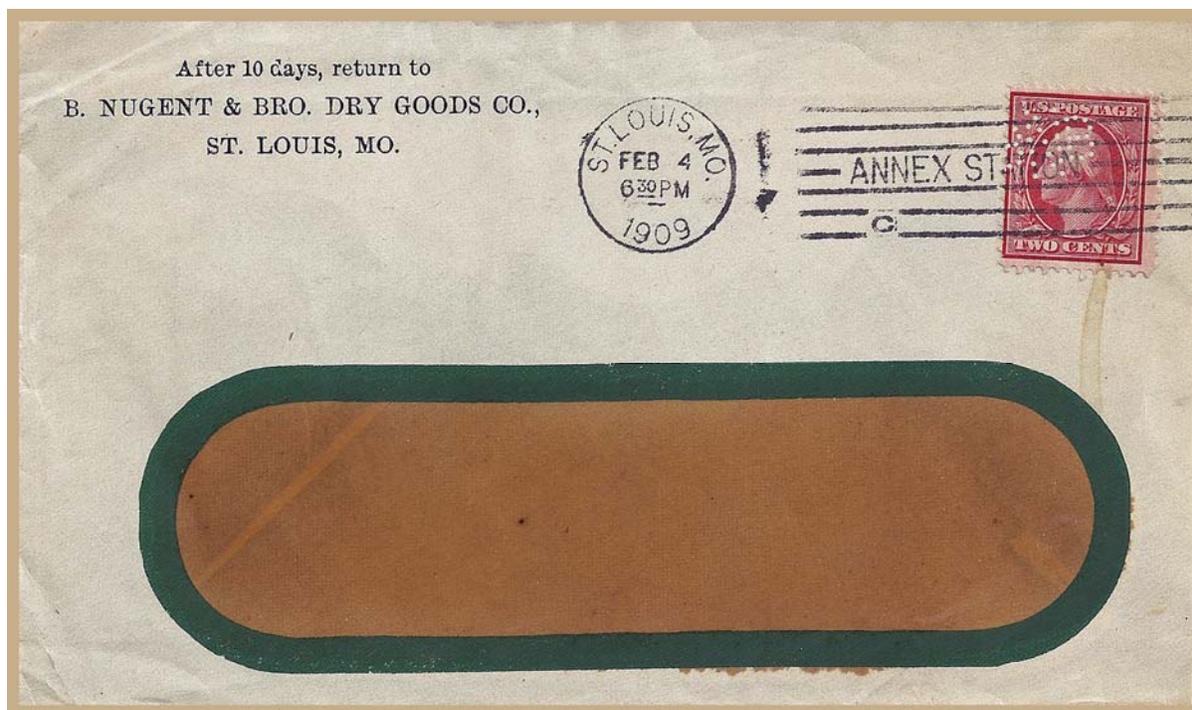

Figure 1
B. Nugent & Brothers Dry Goods Company, St. Louis, MO, cover,
franked with Two cent Washington stamp (Scott #332) perfinned with C+ rate pattern B170.
Provides positive identification of the user of B170.
Note attractive early (February 4, 1909) use of perfin on cover.
(Actual size.)

B170 User Identified (cont.)

Various Internet sources allude to the fact that several members of the extended family continued to be active in the business after James' death in 1918. It appears the store was closed in March 1933.⁽³⁾

Therefore, based on this research, the question has been answered - it is "Brothers." The user for **B170** is "B. Nugent & Brothers Dry Goods

Company, St. Louis, MO," and will be listed as such in A&C#4 of the Catalog.

Assistant Editor - The Need Continues

Ken Masters (#3589)

As I reported on the cover page of the November/December 2012 *Bulletin* [66:133], we need one of our members to step forward and assume the position of Assistant *Bulletin* Editor. As explained there, my responsibilities to assist and care for my spouse have grown significantly, particularly over the last year. Therefore, it has become increasingly difficult for me to find the time to devote to edit and publish a reasonable sized *Bulletin* on the current bi-monthly schedule.

I do not anticipate completely giving up the Editor's job at this time. What I visualize is that the Assistant Editor would share the responsibilities of formatting, layout, and rewriting of some of the articles. I would continue to be responsible for the remainder of the articles, final layout, and coordinating the printing and mailing of the finished publication.

In addition to reducing my load to a manageable level for the foreseeable future, this plan has other

advantages important for the future health of the Club. The most obvious of these is providing a logical succession in case I would become incapacitated and thus eliminate a scramble to find a replacement in a "panic" mode.

The only real requirements for the Assistant Editor's job are that the person have a modern computer, be reasonably versed in the basic word processing software, and have email capabilities. As far as specific software, familiarity with Microsoft Office products would be helpful. Some knowledge of Photoshop Elements (or other similar graphics programs) would be a plus, but certainly not a requirement.

If you have any interest in helping the Club in this important function, please contact our President, Jerry Hejduk, or myself so we can explore this with you in more detail. Our addresses and phone numbers are on page 2.

Philippines perfined postcard realizes high price

Ken Masters (#3589)

Rudy Roy (#1124) recently spotted this Philippines postal card on eBay and forwarded the information to me. His initial comment was that this was "quite a price for an uprated postal card."

The item was described by the seller as a 1918 Philippines WW1 Censored Perfin Uprated Postal Card Manila Cancel to USA. The only additional information provided was that the perfin is pattern "CBI." After receiving 23 bids from 11 different bidders, the final selling price was \$361.00 plus \$1.25 shipping.

Rudy later added that this pattern is fairly common, but so much not on cover. Actually, this is one of the few Philippine perfin covers he has ever seen. If you have any specific reasons why this postal card realized this high price, please forward

them to the Editor and we will share them in a future *Bulletin*. My contact information is on page 2.

Philippines Postal Card uprated with 2-cent definitive stamp with CBI (Philippines Islands A2b) perfin.
(eBay #380519366725.)
(Reduced from actual size.)

Perfins Club Auction #130 Closes February 28, 2013

Guidelines: Lots will be sold to the highest bidder at the following advances over the next higher bidder: \$2-\$5 - a \$0.25 advance; \$5-\$20 - a \$0.50 advance; \$20-100 - a \$1.00 advance; \$101 or higher - a \$5.00 advance. The minimum bid for any lot will be \$2.00 and no "Unlimited" bids will be accepted. In case of tie bids, the earlier postmark or email date will prevail. All single perfins are complete and in good condition, unless noted otherwise. Natural

straight edges are not considered to be defects, just sheet positions. In larger lots, you should expect some faults. All lots are returnable if misdescribed; this does not apply to larger lots or mixes with the exception of gross miscounts. All lots will be prepaid before shipping. **Bid by Lot #.** Please put your mailing address on your bid sheet as this makes it easier for me to notify you after the close of the auction. **Good Luck!!**

Send all bids to: Joe Giampietro, 6478 State Road, G-10, Parma, OH 44134-4166 – USA
Email: mo13jo@aol.com

Solving Red-Orange Color Changing

Steve Endicott (LM#2284)

Red-orange colored stamps sometimes turn brown over the years. This is frequently stated to be caused by oxidation and possibly by exposure to environmental elements. More precisely the chemical process is sulphurization. The red-orange pigment has reacted with sulphur in the air causing the top layer of pigment to turn brown. We see this most frequently with the 4th Bureau 6-cent President Garfield stamps (Scott #558 and #638), but also with the 6-cent Washington head stamps (Scott #336, #429, #468, and #506).

A solution of hydrogen peroxide will remove some or most of the oxidation. A 3% hydrogen peroxide solution can be obtained at most drug stores. Get the smallest size available; I have been told that the shelf life of hydrogen peroxide is less than one year. The smallest size I was able to purchase was 16 fluid ounces for \$1.19.

Put some of the liquid into a watermark tray and place the stamps in the solution. After a short while, I use a cotton Q-tip to gently rub the solution over the face of the stamp. When you are satisfied with the results, be certain to rinse the stamps very well in water before returning them to your collection.

Throw the used solution away. The hydrogen peroxide mixture quickly changes its chemical composition when exposed to air. After a few minutes, all that is left is water.

Two examples of this procedure are illustrated in this article. The first (Figure 1) is a perfinned precancel that has moderate sulphurization on the top third of the stamp. This is perfin **A138** (AH/C) with a New Britain, CT, precancel (PSS Type 257). I put the stamp into the hydrogen peroxide solution for

one minute and then slightly rubbed the very top portion with a Q-tip to encourage more removal.

Figure 1

Results of treating red-orange stamp with moderate oxidation - before on right; after in middle. (Actual size - perfin rotated for clarity.)

The second stamp (Figure 2) is also a perfinned precancel, but this one is extensively "oxidized" - the stamp has turned brown. This is perfin **P182** (PP/Co) with a Reading, PA, precancel (PSS Type 225). I left this stamp in the solution for five minutes. The result is a significant improvement, although not as good as I had desired.

Figure 2

Results of treating red-orange stamp with severe oxidation - before on right; after in middle. (Actual size.)

If you try this process, please first experiment with a few inexpensive stamps. Also, you can purchase more concentrated hydrogen peroxide from internet searches, but it is significantly more expensive. I was content with the results of the ordinary 3% solution from the local pharmacy.

Member Want Ads

Wanted: I am presently engaged in a major study of the perfin of the British Stationery Office - *G. B. New Illustrated Catalogue* numbers **H5200.01aM, H5200.01M, H5200.02** all HM/SO; and **S5630.01M, S Crown O.** I am interested in purchasing - or trading - material with these patterns on stamps, pieces, cards, covers or wrappers. I anticipate the end result will be a major article in the *G. B. Perfin Society Bulletin* as well as a four to six frame National Level exhibit. In order to achieve this, I do need additional material. **Contact:** Michael Millar, FRPSC, 292 Shanty Bay Road, BARRIE, Ontario, Canada L4M 1E6; phone 705-726-5019; email mmillar@apexia.ca.

For Sale: Due to poor health, Ralph Smith, LM#87, has found it necessary to dispose of his perfin collection which features a U.S. Collection of 3300+ stamps mounted "back up" in a 1998 U.S. catalog/album. In addition, there are significant numbers of stamps from 22 other countries found on printed catalog/album pages. The entire holding will be available for inspection and purchase at the Florida Perfins Xchange table during the Florida Precancel Club's Winter Meet in Tampa, FL, February 6-9, 2013. **Contact:** More specific information about the country collections may be obtained from Jerry Hejduk, P.O. Box 490450, Leesburg, FL 34749-0450, USA; email: flprepers@comcast.net.

Wanted: The following New Mexico items on full cover with full corner card and cancel showing New Mexico tie-in. Patterns **C242.5, F70, N113AB-0, S121, S123, S141, S215, S215A, S216, and T34.** Also need pattern **C242.5** as a single stamp. All replies answered. **Contact:** Send list and pricing to Bob Combs, P.O. Box 220, Tome, NM 87060-0220, USA; email: stampmgr@hubwest.com. **NO phone calls please.**

Want ads are published for members on a space-available basis. **Members are entitled to one free ad per year.** Additional ads will be accepted at the following rates: one insertion - 10 cents per word; three consecutive insertions of the same ad - 20 cents per word; six insertions of the same ad - 40 cents per word. Neither the Perfins Club nor the Editor accepts responsibility for the validity of the advertisements. Payment for the ads, payable to "The Perfins Club," should be sent to the Editor with the request for insertion. Payment may also be made via PayPal to: perfin@charter.net with prior notification to the Editor and Treasurer. In the identification line, please indicate this is payment for a member want ad.

Cuban Perfins Website

Ken Masters (#3589)

Robert Littrell (#3992) recently notified the Editor that he has been working diligently to create the following website that completely deals with the perfins of Cuba: <http://www.cubafil.org/MemberPages/RRoy/Perfins.html>.

In addition to depicting all known Cuban perfins and examples of covers, it has a complete bibliography, links, a section on the history of perfins and orientation of a perfin punch. Robert indicates that he cannot find a website that has a

better exposition of its subject matter. As such, it could be a very helpful resource for Club members who have minimal Internet skills and great collections to exhibit.

Robert has also offered to assist any member who is serious about trying to develop some web pages to help them get started with HTML. He may be contacted at: 8150 Chipita Park Road, Cascade, CO 80809-1105, USA; email robert.littrell@comcast.net. Thanks, Robert, for sharing your expertise.
